

In response to numerous customer requests for a reduced cost version of Talon SCE™ that included on screen graphics, Talon Lite™ was launched. Talon Lite™ is packaged with a single TCP/IP Comm Port to

permit polling across the Internet with a mobile laptop that included access to a cellular or other mobile data plan or from a single desktop machine with network Internet access. A serial communications port is included as well for land-line or direct communications. Process programming and Edit Forms may be created as well allowing users to create new applications or modify existing field RTU loads. Parameter changes and other set-points can be edited using the Talon Lite™ software Edit Forms.

Talon Lite™

Talon Monitor™ Read-Only software is available upon request.

- Windows® Operating System: Server 2003, 2008, 2012; Windows® 7, 8.1, 10
- Process Programming
- Master Load Creation and Management
- SCADA and Data Collection System
 - (1) Serial Comm. Port and (1) TCP/IP Port (1 incoming and 1 outgoing) non expandable
- Data Trending, Scheduling, and Auto Reporting
- Includes Circular Charting Capability
- Edit Form Text and Graphics Editor

Talon™ Family

Whether the concern is natural gas distribution, gas pipeline transmission, or well head production, the Talon™ family of software gives the users the ability to create a powerful scalable system that meets their specific needs. Its flexible design provides the option to purchase only those modules needed, and the ability to expand a system with additional features by adding new modules with future growth.
